Functional Requirements Document

Input Validation and Data Processing

REQTRACE AI SYNTHETIC EVIDENCE

Document ID: FRD-IV-001
Revision: Rev01
Release Status: Synthetic baseline
Effective Date: Not applicable - fictional data

1. Purpose

This fictional document defines demonstration requirements for input validation and data processing. It is created only for testing evidence retrieval and traceability behavior.

2. Requirement REQ-017

Requirement ID: REQ-017

The system shall validate input parameters and handle null values without causing a system exception.

Expected behavior:
When process_data() receives a null input pointer, the function shall reject the input, return the defined error status DATA_STATUS_INVALID_INPUT, and shall not dereference the null pointer.

3. Verification

Verification method: Test and code review.

The test shall invoke process_data() using a null pointer and confirm that the defined error status is returned without a system exception.

FICTIONAL TRAINING DATA - NOT FOR ENGINEERING APPROVAL, CERTIFICATION, SAFETY APPROVAL, AIRWORTHINESS APPROVAL, PRODUCTION RELEASE, OR OBSERVATION CLOSURE.
